

GDI IVD™ Intake Valve & Turbo Cleaner

Professional Use

Groundbreaking technology reaches intake valves at **150X more concentration** than any premium fuel system additive on the market.

The **first** product PROVEN to clean damaging deposits from intake valves on all gasoline powered engines, without top-engine disassembly.

PROVEN to remove up to 46% of carbon buildup on intake valves in the first hour after use

- ➔ Excellent **GDI (Gasoline Direct Injection)** valve deposit removal
- ➔ Dissolves and lifts deposits from valve stems and tops of **ALL TYPES** of gasoline powered engines & Standard fuel injection engines
- ➔ Delivers concentrated COzol® chemistry directly to the valves

- Highest Available PEA Detergency
- Improves Fuel Economy & MPG
- Safe on Turbos and Intercoolers
- Solves Rough Starting Problems
- Use Every 16,100 KMs or Before Every Oil Change
- Increases Power and Torque
- Stabilizes Rough Idle
- Alleviates Hesitation & Pinging
- Reduces Emissions

Easy to use - Spray past the MAF sensor through the air intake

Deposits form in every fuel system, but the amount and how quickly they form depends on the quality of fuel and oil you use, your driving style and engine type. GDI (gasoline direct injection) engine intake valves are prone to rapid deposit buildup because they never get cooled or washed with fuel. Deposits form in as few as 8,047 to 16,100 kms, restricting proper airflow and increasing operating temperatures. **SYMPTOMS** include hard starts, rough idle, poor acceleration, reduced fuel economy, excess emissions and power loss.

Part Number: 75320x6

311 g aerosol
6 / case

EASY to Use!
No intake manifold disassembly required.

NEW!
With Permanent 2-Way Actuator
